**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/21/04 has been entered.

***Response to Amendment***

2. Rejection of claims 42-48, 50 and 51 made in the previous Office action under 35 U.S.C. 112, first paragraph is withdrawn in view of the amendment.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 43 and 44 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because the terms "the hydrolyzed polymer" and "the hydrolyzed polymer said agent" lack proper antecedent basis.

***Claim Rejections - 35 USC § 103***

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 42-51 and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over any one of EP 0818474, EP 0818420 and Inagaki et al in view of DE 4444032, Elfine, Monick et al, Horton and Ramirez et al.

This rejection was previously applied for claims 42-53. The rejection is maintained for the claims 42-51 and applied for newly added claim 54 for the reasons indicated in the previous Office action.

As to the newly added limitation requiring the specific range for styrene or/and conjugated diene: the primary references disclose such range. See at least columns 17 and 18 of Inagaki et al and page 3 of EP 0818420.

As to newly added limitations requiring I introducing hydrophilic groups and ion groups: The primary documents teach introducing the same reagents to the same resins as in the specification of the instant application. The obtained polyelectrolytes are the same as claimed cleaning agents.

Newly added claim 54 requires the use of hydrolyzed polymer obtained by polymerization of monomers of acrylonitrile, styrene and conjugated diene. This is disclosed by the primary references.

### ***Response to Arguments***

8. Applicant's arguments filed 6/21/04 have been fully considered but they are not persuasive.

It noted that the applicants again argue that Inagaki et al do not teach a polymer composition made from acrylonitrile and conjugated diene.

This is not persuasive because in contrast to the applicant's statement the documents clearly teach this and even lists the specifically claimed resins as preferred. See column 4, line 46 – column 5, line 8 and the other parts of the Detailed Description.

It is noted that applicants individually argue some of the references used in the rejection. It is noted that the applicants failed to provide any arguments regarding the teachings of EP 0818474, EP 0818420, DE 4444032 and Horton.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).
